FULL-STACK PROJECT

# ShopStock

## Smart Shop & Inventory Management

A complete business system for small retail shops in Pakistan — POS, inventory, khata (udhaar), suppliers, reports, PDF invoices, WhatsApp and an AI assistant.

Python · Flask · SQLite · ReportLab · Bootstrap 5

THE PROBLEM

# Small shops still run on paper registers.

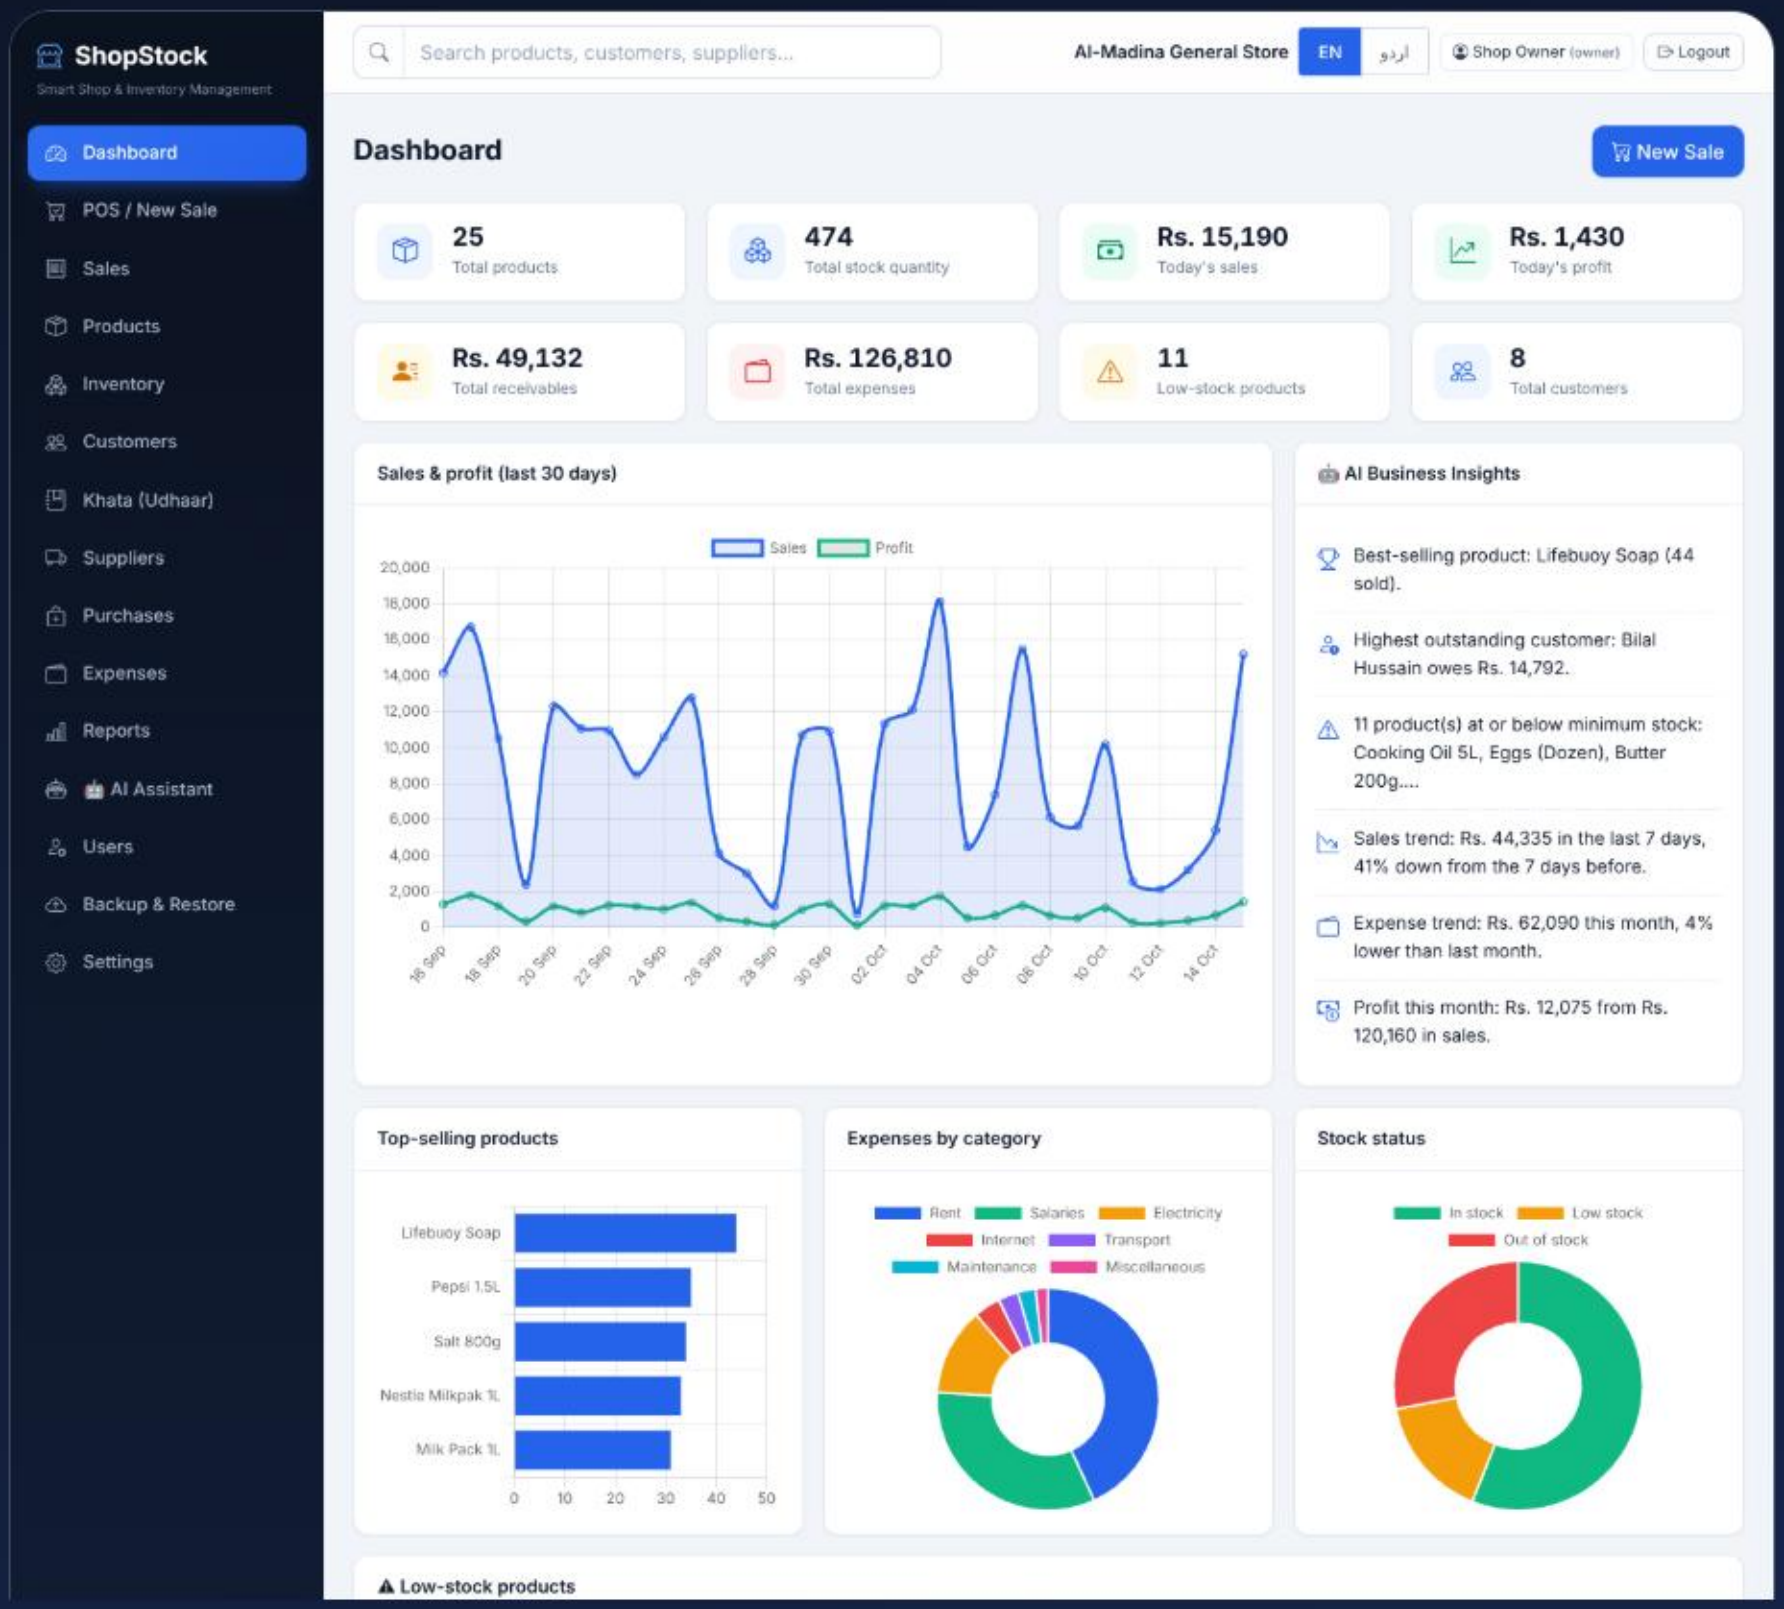

Lost khata pages, no idea about real profit, stock-outs found too late. ShopStock puts the whole shop in one place — built around how Pakistani shopkeepers actually work.

- ✔ Udhaar / khata with statements & WhatsApp reminders
- ✔ Cash, Bank, Easypaisa, JazzCash, Credit
- ✔ Urdu interface & Urdu PDF invoices
- ✔ Works offline — no subscription, no cloud

DASHBOARD

# Real numbers, not guesses.

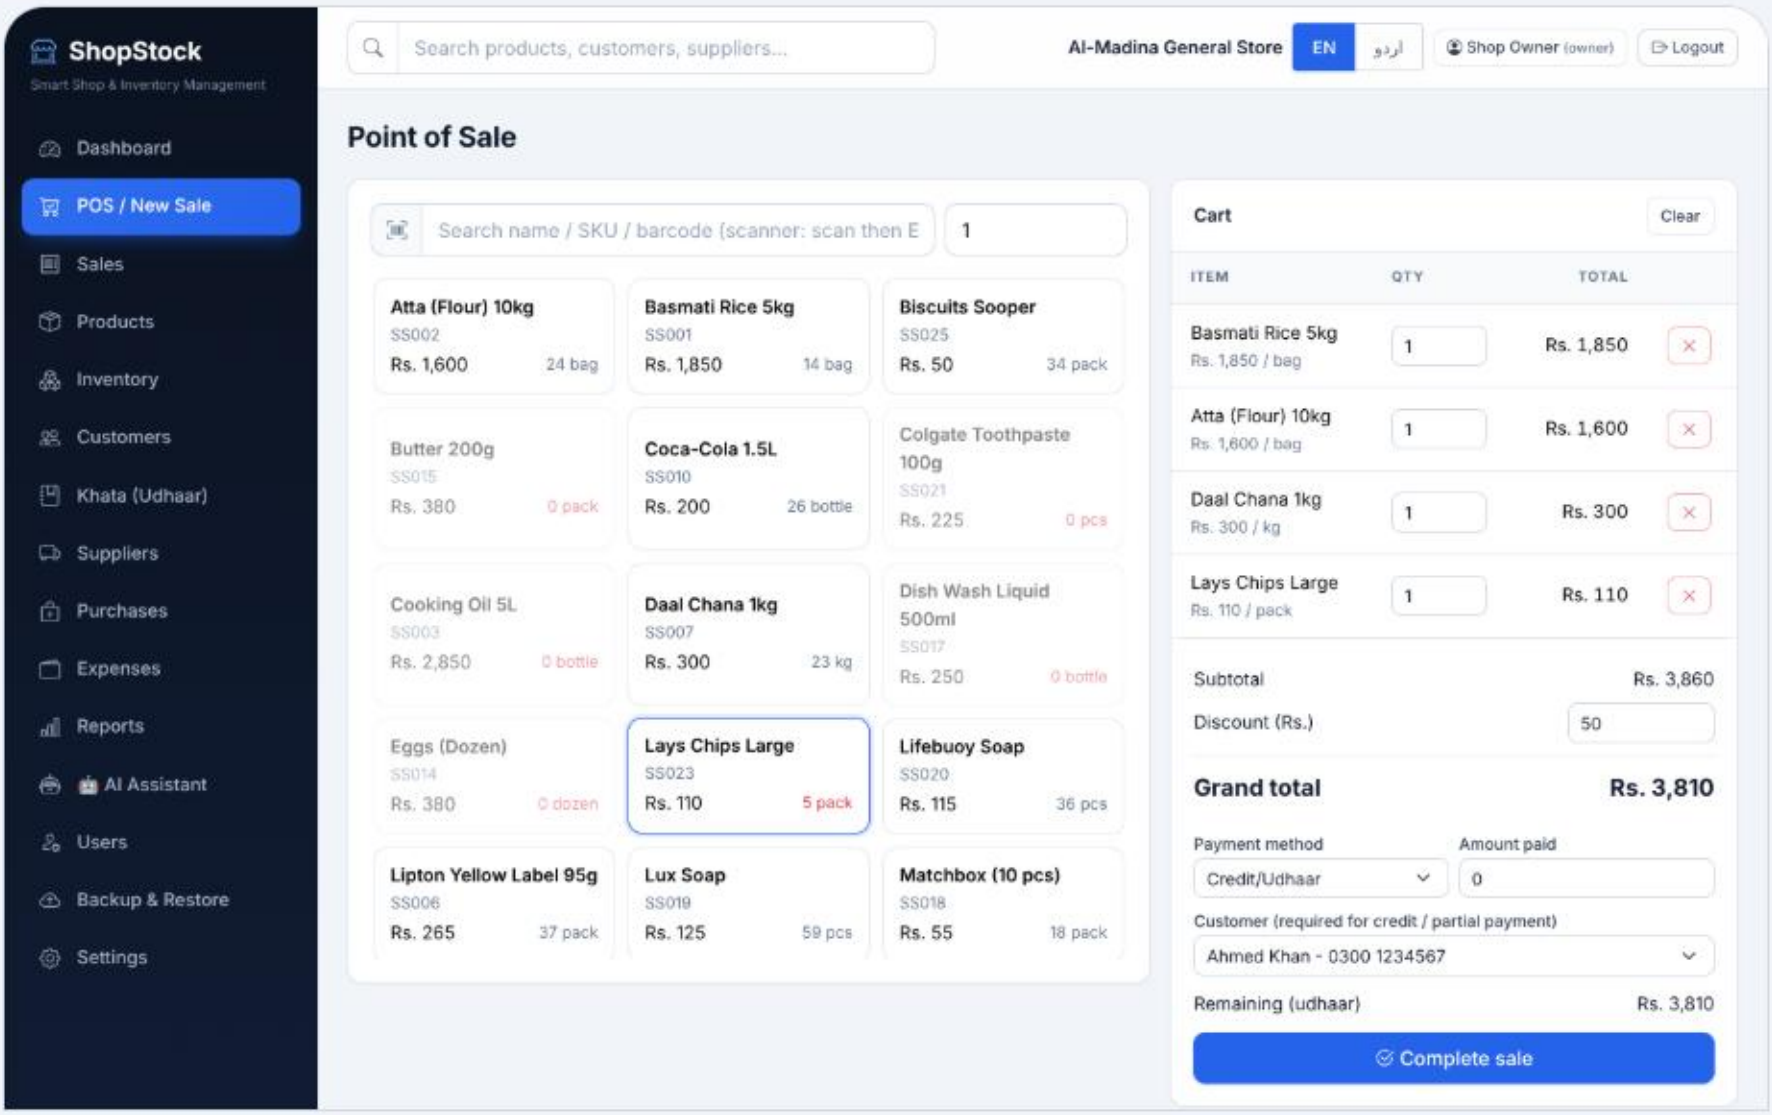

Sales, profit, receivables, expenses and low-stock alerts — all calculated from recorded data, with live charts and business insights.

POINT OF SALE

# Sell in seconds — barcode ready.

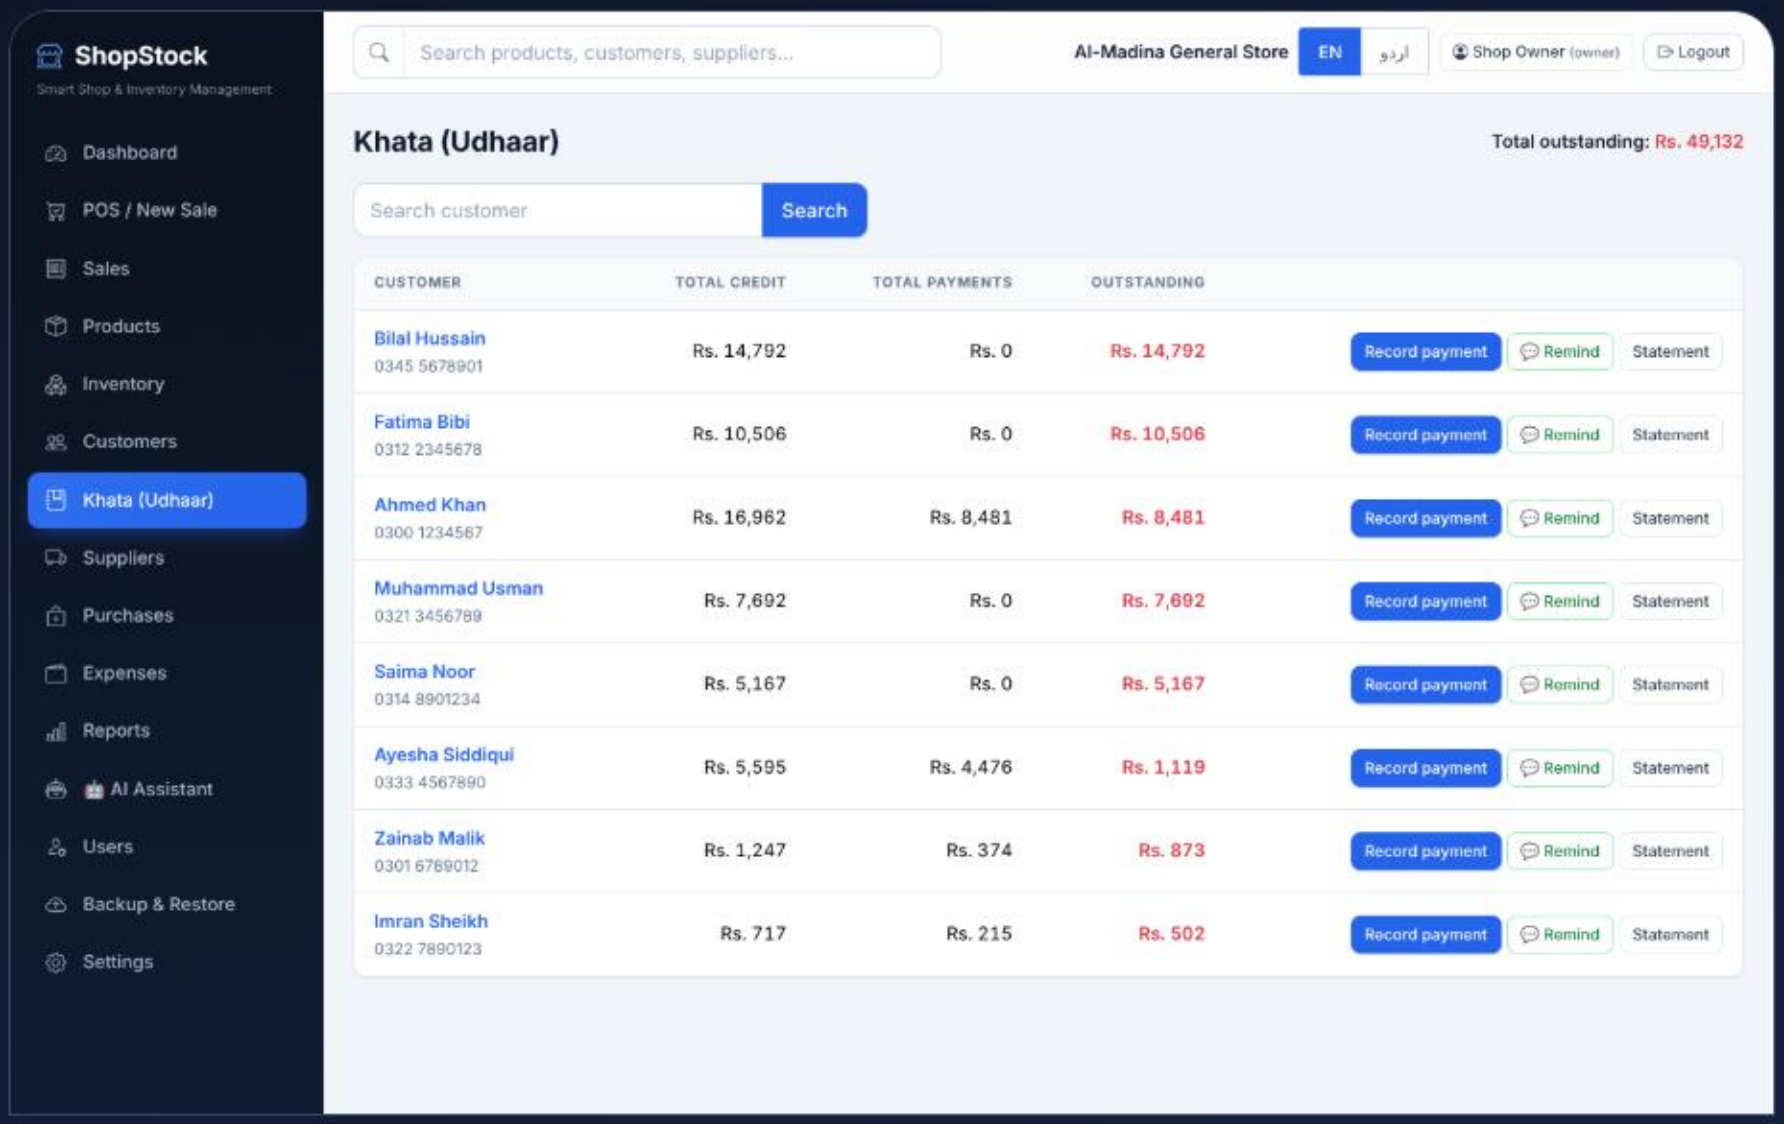

Search or scan, set discount, pick the payment method, and complete the sale. Stock, profit and the customer's khata update automatically.

KHATA & INVOICES

# Udhaar under control.

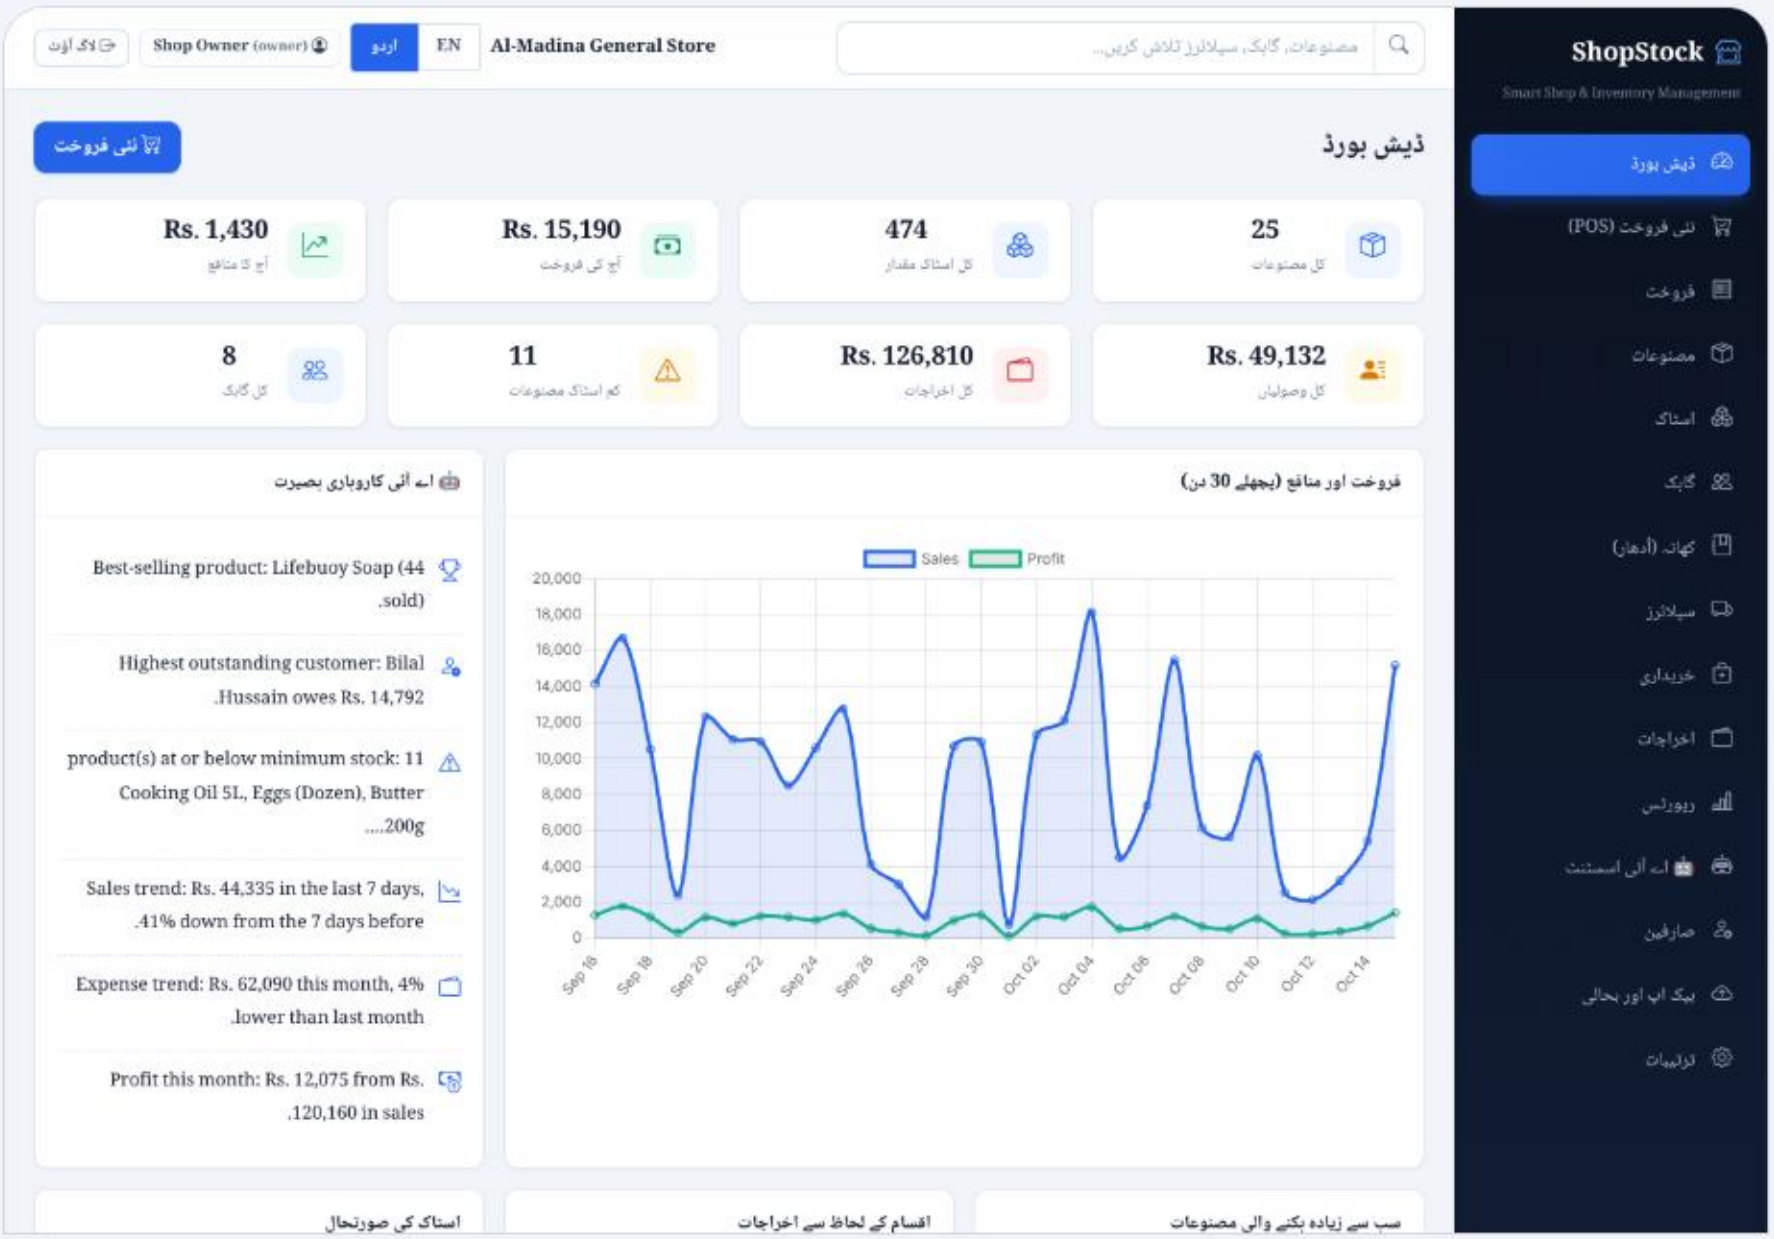

Balances are always calculated from real records — never typed by hand. One-click statements, PDF invoices and WhatsApp payment reminders.

URDU SUPPORT

# اردو انٹرفیس اور انوائس

Switch the whole interface to right-to-left Urdu, and print Urdu PDF invoices and khata statements with proper letter shaping.

BUILT TO BE TRUSTED

# Security, roles & backups.

**2 roles**
Owner & Cashier permissions

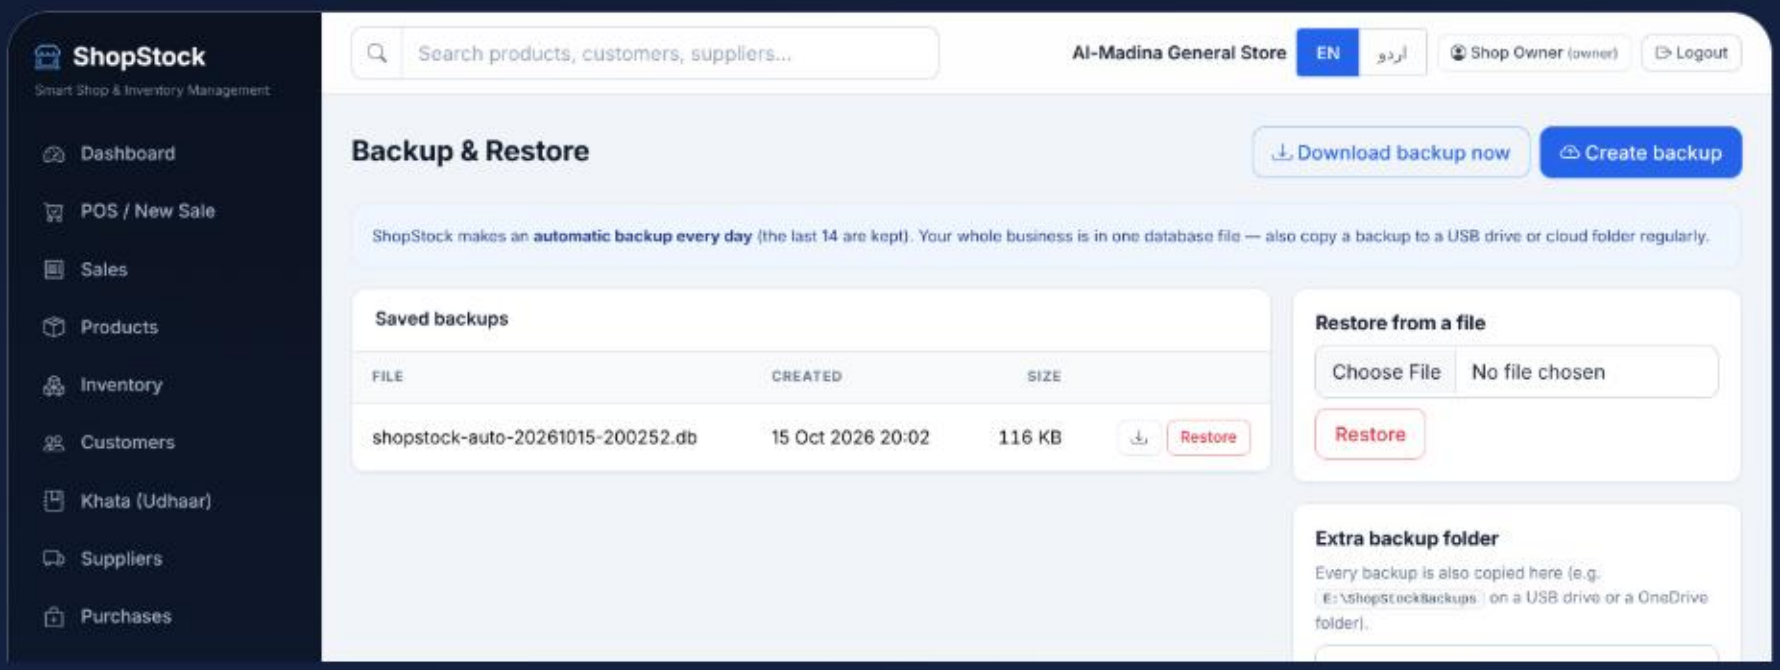

**CSRF**
Protection on every form

**Hashed**
Passwords, forced first-login change

**Daily**
Automatic backups + restore

**Returns**
Refunds & void with stock rollback

**150+**
Automated end-to-end checks

UNDER THE HOOD

# Clean, tested, packaged.

**Backend** Flask · SQLAlchemy · SQLite

**PDF / Excel** ReportLab · openpyxl

**Frontend** Bootstrap 5 · Chart.js · Jinja2

**AI** Gemini, read-only, safe query functions

**Deploy** Waitress · PyInstaller · Inno Setup

**Want to see the code or try it? Let's connect — I'd love your feedback.**
